

VIJAYANAND PUPPALA

Data Governance & Quality Engineering Leader — Metadata, Catalog, Data Quality & Privacy-by-Design
Hyderabad, India | Vijayanand.hyd@gmail.com | +91 9676685631 | [linkedin.com/in/vijayanand-puppala](https://www.linkedin.com/in/vijayanand-puppala) | [Data Portfolio](#) |

PROFESSIONAL SUMMARY

- Quality Engineering Manager with 14+ years leading data governance, cataloguing, and quality engineering across enterprise, cloud, and SaaS platforms, including Hitachi Vantara's Pentaho Data Catalog and Oracle Fusion HCM Cloud.
- Operationalizes governance operating models end-to-end — ownership, stewardship, decision rights/RACI — embedding governance checkpoints into day-to-day delivery across enterprise customer environments.
- Owns metadata and catalog outcomes: business glossary, critical data elements, and certification workflows via REST APIs, delivered for regulated financial-services customers (comparable to Collibra/Alation/Purview-style catalog architecture).
- Leads data quality management end-to-end: DQ rule/threshold definition, profiling, monitoring, and issue triage-through-remediation for PII/NPI at scale.
- Embeds privacy-by-design into governance processes: classification, access control, retention, and DSR erase/rectify/send workflows, aligned to GDPR, HIPAA, and CCPA.
- Coordinates lineage and traceability for governed data products and supports audit readiness through documentation, evidence, and reporting.
- GenAI & agentic engineering: pioneered a spec-driven AI-DLC methodology and an agentic SDET workbench, applying a model mix (Claude, GPT-4, GLM, DeepSeek, local Ollama) to turn governance requirements into production discovery services.
- Partners fluently with CDO, CISO, privacy, and professional-services stakeholders across multi-domain, multi-platform enterprise environments.

CORE COMPETENCIES

Data Governance	Discovery, Catalog & GenAI	Platform & Compliance
Governance Operating Models · RACI	Metadata · Business Glossary · CDEs	GDPR · CCPA · HIPAA · DSR Workflows
Data Quality Rules & Monitoring	Lineage & Traceability	Audit Readiness & Evidence Reporting
Privacy-by-Design · Classification	AI-DLC · Agentic Engineering	AWS · Azure · Snowflake · Docker/K8s

PROFESSIONAL EXPERIENCE

Quality Engineering Manager M3 | Hitachi Vantara India Pvt. Ltd. (Pentaho) — Hyderabad Jan 2022 – Present

- Lead hands-on engineering for Pentaho Data Catalog (PDC) and PDI/BA — discovery, metadata, classification, lineage, access-policy, and governed analytics — across enterprise customer environments.
- Architected automated S3/Lakehouse cataloging and metadata harvesting via PDC REST APIs; delivered BRDs, specs, swimlanes, and client-ready governance controls for regulated financial-services customers.
- Built privacy/sensitive-data discovery for PII/NPI at scale: profiling, data-subject search, classification rules, human review, audit trails, and DSR erase/rectify/send operating flows.
- Defined and operationalized data quality rules and thresholds, monitoring, and an end-to-end issue-management process from triage through remediation and prevention.
- Designed NLP/ML metadata enrichment and classification routing (Legal-BERT via BentoML), turning privacy requirements into production discovery services.
- Pioneered the AI-DLC methodology and Pentaho SDET AI Workbench — a spec-driven agentic engineering practice with deterministic tool use and SQL traceability — adopted as a team standard.
- Partnered with CDO, CISO, privacy, customer success, and professional-services stakeholders on governance, retention, access control, anomaly detection, and observability requirements.

Principal Quality Assurance Engineer | Oracle India Pvt. Ltd. — Hyderabad Jun 2018 – Jan 2022

- Validated security roles, workflows, approvals, and compliance requirements across Oracle Fusion HCM Cloud modules.
- Verified quarterly Oracle Cloud updates and assessed regression and compliance impacts across integrated systems.

- Ensured integrations with ERP, Identity Management, Payroll, and reporting platforms met data-quality and governance expectations.
- Designed and maintained scalable automation frameworks for API, integration, and regression testing supporting audit and compliance reporting.

Senior Engineer | United Technologies Corporation (Lenel) — Hyderabad *Jul 2012 – Jun 2018*

- Analyzed requirements and functional specifications for access-control and video-integration systems, preparing test scenarios and traceability documentation.
- Executed manual and BPT test cases in HP Quality Center; logged and verified defects through resolution.

EDUCATION

- Master of Technology, Electrical & Electronics Engineering — VNR Vignana Jyothi Institute of Engineering & Technology (JNTU, 2012) — 77.93%, First Class with Distinction

ACHIEVEMENTS & CERTIFICATIONS

- Platinum and Gold Awards for successful implementation of the Pentaho Platform across multiple clients — President, Pentaho (Hitachi Vantara)
- Certificate & Multiple Titan Awards for extraordinary performance — Director, UTC
- Certificate & Stallion Award for extraordinary performance — Director, UTC
- Customer Focus Award for exemplary contribution on Oracle Fusion HCM Cloud
