

VIJAYANAND PUPPALA

Data Strategy & Governance Leader — Enterprise Programs, Executive Alignment & Data Maturity

Hyderabad, India | Vijayanand.hyd@gmail.com | +91 9676685631 | [linkedin.com/in/vijayanand-puppala](https://www.linkedin.com/in/vijayanand-puppala) | [Data Portfolio](#) |

PROFESSIONAL SUMMARY

- Quality Engineering Manager with 14+ years translating enterprise data strategy and governance vision into operational deliverables across enterprise, cloud, and SaaS platforms, including Hitachi Vantara's Pentaho Platform.
- Partners directly with CDO, CISO, privacy, customer success, and professional-services leadership to align data initiatives with business goals and drive adoption of governance frameworks across multiple domains.
- Translates enterprise-level governance direction into tactical, operational-level impact — policies, standards, and client-ready controls — for regulated financial-services customers.
- Drives cross-functional alignment on governance, retention, access control, anomaly detection, and observability requirements across multi-domain, multi-platform environments.
- Strong understanding of data governance concepts — sensitive data identification, access control, compliance validation, audit reporting — and regulatory requirements including GDPR, HIPAA, and CCPA.
- GenAI & agentic engineering: pioneered a spec-driven AI-DLC methodology and an agentic SDET workbench adopted as a team standard, applying a model mix (Claude, GPT-4, GLM, DeepSeek, local Ollama) to accelerate the enterprise's data maturity journey.
- Collaborative leader with strong stakeholder-management and executive-communication skills, committed to measurable adoption and control-effectiveness outcomes, not just documentation.

CORE COMPETENCIES

Data Strategy & Governance	Stakeholder & Executive Alignment	Platform & Engineering
Enterprise Governance Frameworks	CDO/CISO/Privacy Partnership	AWS · Azure · Snowflake · K8s/Docker
Policy, Standards & Adoption	Cross-Domain Program Delivery	AI-DLC · Agentic Engineering
GDPR · CCPA · HIPAA Compliance	Client-Facing Governance Controls	Metadata, Catalog & Data Quality

PROFESSIONAL EXPERIENCE

Quality Engineering Manager M3 | Hitachi Vantara India Pvt. Ltd. (Pentaho) — Hyderabad Jan 2022 – Present

- Lead hands-on engineering and program direction for Pentaho Data Catalog (PDC) and PDI/BA — discovery, metadata, classification, lineage, and governed analytics — across enterprise customer environments and multiple release cycles.
- Translate platform-level governance vision into operational deliverables: architected automated S3/Lakehouse cataloging via PDC REST APIs and delivered BRDs, specs, swimlanes, and client-ready controls for regulated financial-services customers.
- Partner with CDO, CISO, privacy, customer success, and professional-services stakeholders to align governance, retention, access-control, anomaly-detection, and observability requirements with business goals.
- Built privacy/sensitive-data discovery for PII/NPI at scale, driving adoption of classification rules, human review, and DSR erase/rectify/send operating flows across customer domains.
- Pioneered the AI-DLC methodology and Pentaho SDET AI Workbench — a spec-driven agentic engineering practice adopted as a team standard, demonstrating measurable adoption outcomes rather than documentation alone.
- Directed and mentored QA/engineering teams, delegating and reviewing work to build organizational capability alongside governance program delivery.

Principal Quality Assurance Engineer | Oracle India Pvt. Ltd. — Hyderabad Jun 2018 – Jan 2022

- Ensured integrations with ERP, Identity Management, Payroll, and third-party systems met quality and compliance expectations across a global HCM platform.
- Verified quarterly Oracle Cloud updates and assessed regression and business impact across integrated modules.
- Validated security roles, workflows, approvals, and compliance requirements in partnership with cross-functional stakeholders.
- Monitored customer satisfaction metrics and identified opportunities to enhance product quality and usability at enterprise scale.

Senior Engineer | United Technologies Corporation (Lenel) — Hyderabad *Jul 2012 – Jun 2018*

- Analyzed requirements and functional specifications for enterprise access-control and video-integration systems, preparing test scenarios and stakeholder documentation.
- Coordinated defect logging, verification, and cross-functional resolution across firmware, functionality, and performance testing.

EDUCATION

- Master of Technology, Electrical & Electronics Engineering — VNR Vignana Jyothi Institute of Engineering & Technology (JNTU, 2012) — 77.93%, First Class with Distinction

ACHIEVEMENTS & CERTIFICATIONS

- Platinum and Gold Awards for successful implementation of the Pentaho Platform across multiple clients — President, Pentaho (Hitachi Vantara)
- Certificate & Multiple Titan Awards for extraordinary performance — Director, UTC
- Certificate & Stallion Award for extraordinary performance — Director, UTC
- Customer Focus Award for exemplary contribution on Oracle Fusion HCM Cloud
